STEDA x Taleemabad

Rumi Deployment Plan — v2.0 Revised

Updated: March 30, 2026 | Call 1 moved to Thursday April 2 | Call 2 set for mid-May

Live Dashboard Snapshot — March 30, 2026

📡 **LIVE**

Data pulled from rumi-dashboard.vercel.app/steda on March 30, 2026. This section auto-updates when the plan is refreshed against the dashboard.

1,346	909	427	1,354
Teachers Listed	Joined Rumi	Used Any Feature	Total Requests
STEDA cohort	68% of listed ✅	47% of joined ⚠️	96% completion ✅

Feature Adoption Breakdown

Feature	Teachers	Requests	Completion	Status
📝 Lesson Plans	**409 (45% of joined)**	1,157	**98% ✅**	🟢 Strong
🖼️ Image Analysis	47 (5%)	126	100% ✅	🟡 Passive
🎬 Video Generation	37 (4%)	67	55% ⚠️	🟡 Growing
📖 Reading	2 (<1%)	2	0% ❌	🔴 Not started
🤝 Coaching	**1 (<1%)**	2	**50% ❌**	🔴 **Critical gap**

🚨 **CRITICAL**	Coaching is the core differentiator but has only 1 teacher using it. This validates Haroon's diagnosis from March 16 and makes Call 1 (coaching walkthrough) the single most important near-term action.

Engagement Depth — Where Teachers Are Stuck

No Features Yet	1 Feature Used	2 Features	3+ Features
482 teachers (53% of joined)	364 teachers (40% of joined)	57 teachers (6% of joined)	**6 teachers (< 1% of joined)**

482 teachers joined Rumi but have never used any feature — this is the activation gap to close before the teacher call. The majority of those who do use Rumi only use lesson plans.

WhatsApp Community — Voice of the Teacher

Questions (16%)	Issues (6%)	Positive (6%)	Other (73%)
205 messages — mostly 'How do I register / use Rumi?'	79 messages — lesson plan complexity, video quality, chatbot vs ChatGPT	74 messages — lesson plan praise, teacher success stories	963 messages — shared content, off-topic, file uploads

📣 **TEACHER VOICE**	Top feedback from community: (1) Lesson plans too complex for primary grades — 'Rumi bana raha hai jaise primary teacher PhD holder ho' (2) Video lesson plans not working well (3) Comparison to ChatGPT — some teachers prefer it for flexibility. These must be addressed in Call 1.

Plan vs. Actuals Tracker

📊 HOW TO USE	This section maps deployment plan targets against live dashboard numbers. Update the 'Actual' column after each dashboard refresh. Green = on track. Orange = at risk. Red = off track.

Metric	Target	Actual (Mar 30)	Status
Teachers Registered / Joined	≥70% (941+)	**909 (68%)**	🟡 Close — 32 short of target
Used Any Feature	100% of joined	**427 (47%)**	🔴 482 teachers stuck at zero usage
Generated ≥1 Lesson Plan	100% of joined	**409 (45%)**	🟡 Strong uptake but gap remains
Lesson Plan Request Completion	≥95%	**98% ✅**	🟢 Exceeding target
Coaching Feature Usage	Widespread (25%+ of joined)	**1 teacher (0.1%)**	🔴 **CRITICAL — Call 1 priority**
Video Generation Usage	Introduced (not yet KPI)	37 teachers (4%)	🔵 Early signal — include in Call 1
WhatsApp Community Members	481 tracked	**481 ✅**	🟢 Live sentiment being tracked
Master Trainer Activation	25/25 (100%)	Not yet tracked	🟡 Schedule MT orientation Call

Two-Call Teacher Engagement Strategy (Confirmed)

✅ **AGREED**	Per Junaid's proposal to Haroon (March 29, 2026) and Haroon's original recommendation: two focused calls replace one broad session. Each call has a single clear outcome.

Call 1 — Lesson Plans + Coaching (Post-Eid, April 2nd)

Why these two features together?

- Lesson plans: already the strongest feature (409 teachers, 1,157 requests) — build on success
- Coaching: only 1 teacher using it — this is the biggest gap and the biggest differentiator
- Both features reduce teacher workload in the classroom → connected mental model

Agenda

1. **Lesson Plan Power Features (20 mins)**
   - Sindhi-medium lesson plan demo — specifically for Sindhi-medium teachers (per Rumi AI feedback, March 16)
   - Short lesson plan format — directly addresses teacher feedback that plans are too complex for primary grades
   - Lesson Plan → Presentation conversion (live)
   - Lesson Plan → Video script conversion (live) — addresses the 55% video completion issue
2. **Coaching Feature Walkthrough (20 mins)**
   - Show a real AI coaching note output — not just explain it, show it. Seeing the output changes adoption.
   - Address the confusion: coaching is not surveillance — it is your personal feedback loop
   - Demonstrate one full coaching cycle end to end
3. **Live Recovery — Help inactive teachers get started (15 mins)**
   - Target the 482 teachers who joined but never used a feature
   - Live /register and /lessonplan help for anyone stuck

🎯 **SUCCESS METRIC (Call 1)**	By end of Call 1: Coaching users grow from 1 → 50+. Active lesson plan users grow from 409 → 600+. Inactive teacher count drops from 482 → <200.

Call 2 — Attendance + Quiz (Mid-May, approx. April 13–15)

⛔ **PREREQUISITE**	Junaid must learn and personally test Attendance + Quiz before Call 2 is scheduled. This is non-negotiable — do not schedule without this.

- Why this feature matters: 25–30 students per teacher = 25–30x user expansion per teacher who activates it
- The student/parent loop: Teacher creates quiz → Rumi sends to student/parent → collects responses → morning report to teacher
- Sticky adoption: when it does the teacher's administrative work, it becomes indispensable
- Brand reach: parents see Rumi → organic expansion beyond the 1,346 STEDA cohort

⚠️ **HAROON'S CAUTION (enforced)**	Call 2 covers ONE feature only: attendance + quiz. No additional features added without explicit agreement. Feature overload = zero retention.

Deployment Timeline — v2.0

📅 **UPDATE**	Call 1 (Lesson Plans + Coaching) moved to Thursday April 2, 2026 — this week. Call 2 (Attendance + Quiz) confirmed for mid-May. All other milestones adjusted accordingly.

Date	Phase	Key Activities	Target / Status
Mar 9–16	✅ Phase 1A — Initial Onboarding	Teacher launch, /register push, WhatsApp group live	909 joined (68%) — above 63% at Mar 16 ✅
Mar 30 – Apr 1	🔄 Re-engagement Prep	Revamp onboarding message, Android journey fix, cohort nudge list, activate 482 inactive teachers before Call 1	Onboarding message live by Apr 1. Teachers primed for Thursday call.
★ **THIS WEEK** **Thursday** April 2, 2026 2:00 – 3:15 PM PKT	📞 **Call 1 — Lesson Plans + Coaching**	**Agenda (75 mins):** • Sindhi & short-format lesson plans (20 mins) • LP → Presentation & Video conversion demo (10 mins) • Coaching walkthrough — show actual output (25 mins) • Live help for 482 inactive teachers (20 mins)	**Targets post-call:** Coaching: 1 → 50+ teachers Active users: 427 → 600+ Registration: push toward 1,000+
Apr 3–10	👥 Master Trainer Activation	25 MTs onboarded to dashboard, AI coaching note demo, each conducts ≥1 Rumi-informed intervention before Apr 10 report	25/25 MTs logged in + ≥1 coaching intervention documented

April 10	📊 **Month 1 Fidelity Report**	Submit to ED Rasool Bux. Must include: registration rate (target 75%), lesson plans generated (1,157+), coaching baseline from Call 1, at least 1 classroom quality indicator	Hard data only — no narrative. Data owner must be named by April 3. Call 1 data feeds directly into this report.
Apr 14–30	🎙️ Classroom Observation Launch	Simplified guide: voice note OR file (no M4A conversion — backend handles it). Non-punitive framing in first message. Builds dataset for Phase 2.	Target: ≥20% of registered teachers submit ≥1 audio by end of April
Apr 14–30	📚 **Junaid Learns Attendance+Quiz**	Block 2 hours/day to personally learn and test Attendance + Quiz feature before Call 2. Test on real student accounts. Build demo script.	**Non-negotiable prerequisite. Call 2 cannot be scheduled until Junaid signs off on product readiness.**
MID-MAY **May 13–15** 2026 TBC after readiness	📞 **Call 2 — Attendance + Quiz**	**Agenda (45–60 mins):** • Attendance feature demo (15 mins) • Quiz creation + student/parent loop (15 mins) • Morning report demo — what teacher sees next day (10 mins) • Live Q&A + pilot sign-up (10 mins)	**Why mid-May?** • 6 weeks post Call 1 — lesson plans habit formed • 25–30 students per teacher = massive reach multiplier Target: ≥100 teachers opt into attendance+quiz pilot
May–Jun 2026	🔬 Phase 2 — Data-Driven Training	Teacher skill profiles from observation. Personalized training nudges. Admin/Coach/Leadership dashboard roles activated.	Repeatable teaching gaps identified. CPD credit integration proposed to STEDA.
Jun–Sep 2026	📄 Routes to Paid Contract	Route 1 (PC-1/SELECT): April 10 report triggers lobbying. Route 2 (E-Ustaad): Integration builds dependency regardless of PC-1 status.	Convergence: Both routes meet at Month 6 when E-Ustaad integration is live and pilot data is strong enough for concept note.

Call 1 — Detailed Plan (Thursday April 2, 2026)

📍 **LOGISTICS**	Date: Thursday April 2, 2026 | Time: 2:00 PM – 3:15 PM PKT | Format: Zoom / Google Meet | Audience: All 909 joined teachers (priority: 482 who have never used a feature)

Why Thursday April 2?

- School reopening is April 1 — teachers are back in classroom mode and actively thinking about lesson prep
- April 10 report deadline in 8 days — data from this call feeds directly into the Month 1 Fidelity Report
- Coaching has only 1 user out of 909 joined — every day without a walkthrough is a lost activation opportunity
- Haroon's original intent: teachers requested a call over Eid break — this delivers on that promise immediately

Preparation Checklist (by Wednesday April 1)

1. **WhatsApp broadcast to all 909 joined teachers — short, warm, time + Zoom link**
   - Keep it under 5 lines. Include: date, time, what they'll learn, and the direct call link
   - Language-matched: Urdu message for Urdu-medium, Sindhi for Sindhi-medium
2. **Prepare live demo for Sindhi-format lesson plan (not just describe it — show it live)**
3. **Prepare one actual AI coaching note output to show (mock is fine — teachers need to SEE it)**
4. **Have the LP → Presentation conversion ready to demo live**
5. **Send calendar invite with Google Meet link to Haroon, Waqas, and any STEDA POC who should join**

Agenda (75 Minutes)

Time	Segment	Goal
2:00–2:05	Welcome + housekeeping. Quick poll: have you used Rumi this week?	Warm the room. Set expectations.
2:05–2:25	Lesson plan power features:• Sindhi medium demo (live)• Short format for primary grades (addresses teacher complaint: 'too complex')• LP → Presentation conversion (live)• LP → Video script (live)	Make them feel like power users of something they already know.
2:25–2:50	Coaching feature walkthrough:• Show actual AI coaching note output — not a description• Frame it: coaching is for YOUR development, not evaluation• Demo full cycle: record → upload → receive feedback• Address the confusion head-on	Coaching users: 1 → 50+. This is the single most important segment.
2:50–3:05	Live recovery session:• Help inactive teachers open Rumi right now• Walk through /register and first lesson plan together• Collect reasons why inactive teachers haven't started	Convert 482-strong dormant group. Even 50 activations = 11% conversion.
3:05–3:15	Q&A + close:• Top 3 questions only• Tease: 'In May we'll show you something that involves your students'• Remind: feedback is the best way to improve Rumi for them	Build anticipation for Call 2. End on energy.

🎯 SUCCESS METRIC	By Friday April 3: Coaching users 1 → 50+. Active lesson plan users 427 → 550+. Feedback collected from at least 20 inactive teachers on why they haven't started.

Call 2 — Attendance + Quiz (Mid-May, TBC)

📅 TIMING	Confirmed for mid-May — approximately May 13–15, 2026. Exact date to be confirmed once Junaid has personally tested the Attendance + Quiz feature. Do not schedule without this.

The Business Case for This Feature

- Each teacher has 25–30 students → every teacher who activates = 25–30 new user touchpoints for Rumi
- If 100 teachers activate: up to 3,000 new parents/students see Rumi — massive organic brand reach
- Makes attendance register automatic for the teacher — high utility, sticky adoption
- Quiz → student/parent loop → morning report: Rumi does the teacher's admin work for her
- Parents seeing Rumi builds the case for a government-wide rollout beyond just teacher CPD

⛔ HARD GATE	Junaid must personally complete the Attendance + Quiz feature before this call is scheduled. This is non-negotiable. A bad demo of a half-understood feature is worse than no demo at all.

Between Call 1 and Call 2 — What Must Happen

By	Action	Owner
April 3	Collate Call 1 coaching activation numbers. Feed into April 10 report.	Junaid
April 10	Month 1 Fidelity Report submitted to ED Rasool Bux with hard data.	Junaid + Haroon
April 14	Classroom observation guide sent to all teachers (voice note OR file — no M4A required).	Junaid + STEDA POC
April 30	Junaid confirms he has personally tested and can demo Attendance + Quiz end-to-end.	Junaid
May 5	Call 2 invite sent to teachers with teaser: 'What if Rumi could help your students too?'	Junaid
May 13–15	Call 2 — Attendance + Quiz — 45-60 mins.	Junaid

Immediate Actions — Before Thursday

⏰ URGENT	Today is Monday March 30. Call 1 is Thursday April 2. You have 3 days to prepare. Everything below must be done by Wednesday evening.

Action	Owner	Deadline
Draft WhatsApp broadcast to 909 teachers: date, time, Zoom link, what they'll learn (Urdu + Sindhi versions)	Junaid	**Today (Mar 30)**
Set up Zoom / Google Meet link and add to calendar invite	Junaid	**Today (Mar 30)**
Send calendar invite to Haroon, Waqas, STEDA POC	Junaid	**Today (Mar 30)**
Prepare live Sindhi lesson plan demo — test it in Rumi before Thursday	Junaid	Tue Apr 1
Prepare one coaching output sample — mock or real, but visible and clear	Junaid	Tue Apr 1
Revamp onboarding message for the 482 inactive teachers — list-based, Android-friendly	Junaid + Mahnoor	Tue Apr 1
Name the April 10 Fidelity Report data owner — assign internally	Junaid + Haroon	**Wed Apr 1**
Dry run the call with Waqas — test all demos end to end	Junaid + Waqas	Wed Apr 1

Dashboard Integration — Keeping Deployment Plan Live

💡 **VISION**	The deployment plan should not be a static document. The goal is to connect plan targets with live Rumi dashboard data so tracking is automatic and weekly reporting is a click — not a manual exercise.

Current State

- Live dashboard: rumi-dashboard.vercel.app/steda — shows teachers joined, feature usage, requests, sentiment, district breakdown
- Deployment plan: static Word document updated manually
- Gap: no automated comparison between plan targets and actual dashboard numbers

Proposed Integration Approach

Option A — Live Tracking Spreadsheet (Quick, 1–2 days)

- Create a Google Sheet with deployment plan targets hard-coded
- Weekly: copy key metrics from Vercel dashboard into the sheet
- Sheet auto-calculates: % of target achieved, RAG status, trend vs prior week
- Share with Haroon and STEDA POC as a living progress tracker

Option B — API-Connected Tracker (Best, 1–2 weeks)

- Expose a read-only JSON API endpoint from the Vercel dashboard (e.g., /api/steda-metrics)
- Build a lightweight tracking page (or add to existing dashboard) that shows: Plan target vs Actual vs Delta vs Trend
- Metrics to include: teachers joined %, feature activation %, lesson plans per teacher, coaching users, community sentiment breakdown
- This dashboard becomes the Fidelity Report source of truth — ED Rasool Bux can be given access

Option C — Claude-in-Chrome Weekly Check (Immediate, 0 setup)

- Every Monday: Claude in Chrome opens the Vercel dashboard, reads live numbers, compares against plan targets
- Generates a weekly status report (like this Word doc) automatically
- Sends summary to Junaid and Haroon via WhatsApp or Email
- No engineering required — works today with existing setup

✅ **RECOMMENDATION**	Start with Option C immediately (zero setup cost). Build Option B in parallel as the permanent solution. Option A as bridge if Option B takes longer than 2 weeks.

Key Metrics to Track Weekly

Metric	Plan Target	Current (Mar 30)	Source
Teachers Joined (% of 1,346)	≥75% by Apr 7	68% (909)	Dashboard / Funnel
Feature Activation Rate	100% of joined	47% (427)	Dashboard / Usage
Lesson Plans Generated	1 per teacher	1.3 avg (1,157/909)	Dashboard / Feature
Coaching Users	≥25% by Apr 30	0.1% (1 teacher)	Dashboard / Feature
Video Completion Rate	≥80%	55% ⚠️	Dashboard / Feature
Community Questions/Issues	Declining week-on-week	22% (284 msgs)	Sentiment tracker
Master Trainer Logins	25/25 by Apr 30	Not yet tracked	MT Dashboard

Open Actions & Risk Register

Immediate Actions (This Week)

Action	Owner	Deadline

Revamp WhatsApp onboarding: list-based, ≤3 steps, add benefit CTA for inactive 482 teachers	Junaid + Waqas	April 1
Create Android user journey (button-tap, no slash commands) — Notion card	Mahnoor	April 1
Address top teacher feedback: simpler lesson plans for primary grades (Class 1–3)	Product / Junaid	April 3
Improve video generation completion from 55% → 80%+ (fix issues teachers flagged)	Product	April 7
Name the April 10 Fidelity Report data owner — who formats and presents it?	Junaid + Haroon	April 3
Schedule Call 1 — Zoom invite + agenda to all 909 joined teachers	Junaid	April 10
Start learning Attendance + Quiz feature — block 2 hrs/day this week	Junaid	April 30
Decide on dashboard integration approach (Option A/B/C above)	Junaid + Adeel (web team)	April 5

Risk Register (Updated with Live Data)

Risk	Likelihood	Impact	Mitigation
482 teachers joined but never used Rumi — won't attend Call 1	High	High	Targeted WhatsApp nudge with specific benefit ('get your first lesson plan in 90 seconds') before Call 1
Coaching remains at 1 user after Call 1 — demo doesn't land	Medium	Very High	Show actual coaching output during call, not description. One-on-one follow-up for cluster leads.

Video completion stays at 55% — teachers lose confidence in Rumi	Medium	High	Fix video issues before Call 1. Don't demo a broken feature.
Teachers compare Rumi to ChatGPT and find it lacking	High	Medium	Acknowledge it in Call 1 — Rumi is STBB-aligned and curriculum-specific; ChatGPT is generic. Show the difference live.
April 10 report has no hard instructional quality data	Medium	Very High	Use video completion rate + coaching adoption as proxies. Prepare dashboards now, not April 9.
Junaid not trained on Attendance+Quiz before Call 2 date	Low (controllable)	High	Hard gate: Call 2 cannot be scheduled without Junaid signing off on product readiness.
