# STEDA × Rumi

## Partnership Impact Report

AI-Powered Teaching Pilot — Sindh Province, Pakistan

**Report Date:** March 12, 2026 **Prepared by:** Rumi Data Team **For:** STEDA Program Leadership

| 1,349 | 853 | 316 | 683 | 503 |
|---|---|---|---|---|
| Teachers Listed by STEDA | Joined Rumi (63.2% of list) | Used Lesson Plans | Lesson Plans Generated | WhatsApp Community Members |

## Executive Summary

The STEDA–Rumi pilot launched in Sindh Province represents a landmark step in bringing AI-powered teaching assistance to government school teachers at scale. This report covers the period from **January 2026 through March 12, 2026**, analysing the activation of **1,349 STEDA-listed teachers**, their onboarding into the Rumi platform, lesson-plan generation activity, and real-time feedback from the WhatsApp community.

### ✓ What Worked

- **853 teachers activated** (63.2%) in under 3 weeks
- **100% completion rate** on lesson plan requests
- **Strong first impressions** — teachers generating plans within minutes of joining
- AI processing stable at **~2.4 min** regardless of load
- Organic peer-support in WhatsApp community

### ■ Needs Attention

- **496 teachers (36.8%)** not yet activated on Rumi
- Queue saturation on Mar 11 — wait time hit **4 hours**
- Registration guidance was **confusing** for many teachers
- Video/animation requests caused **confusion** about capabilities
- **Portal login issues** reported by multiple teachers

# 01 Onboarding Funnel & Teacher Activation

Of the **1,349 teachers listed in STEDA's onboarding file**, **853 (63.2%)** have successfully activated their Rumi accounts. The majority arrived in two waves: the **February batch** (107 teachers, 24–27 Feb) and the **March 11–12 surge** (692 teachers in two days).

| | |
|---|---|
| Listed by STEDA | **1,349 / 1,349 (100%)** |
| Activated on Rumi | **853 / 1,349 (63%)** |
| Used Lesson Plans | **316 / 1,349 (23%)** |
| Not Yet Joined | **496 / 1,349 (37%)** |

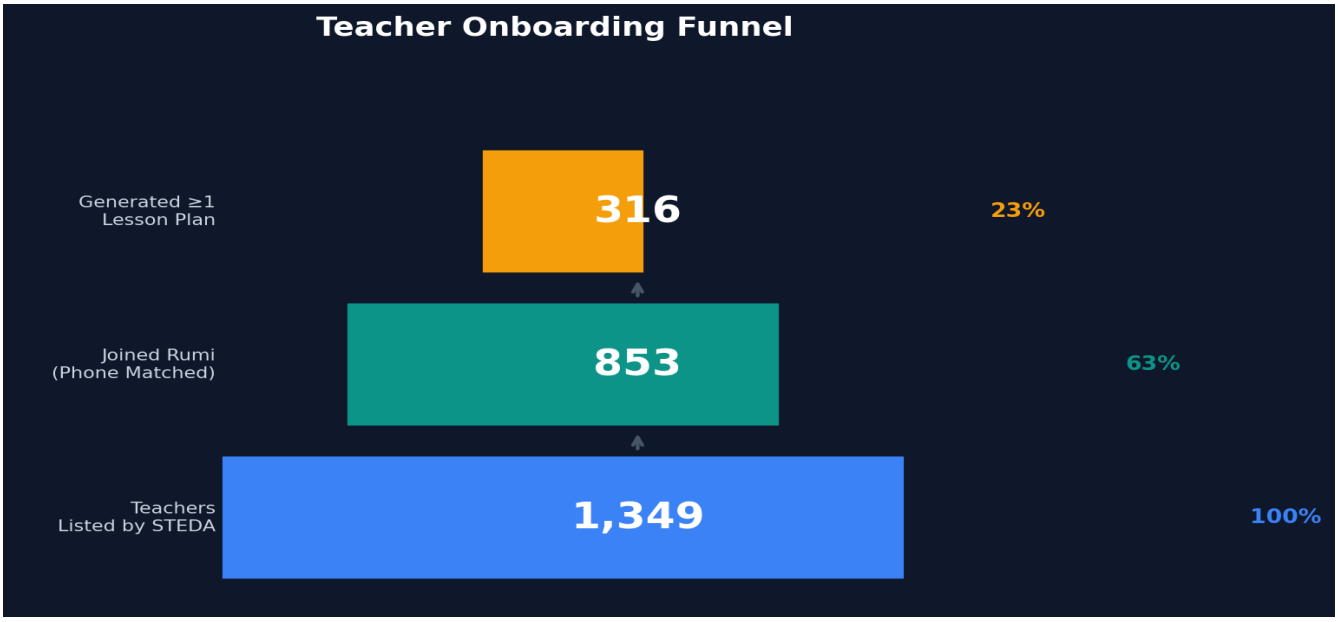

*Figure 1 — Onboarding funnel: from STEDA list → Rumi activation → lesson plan usage.*

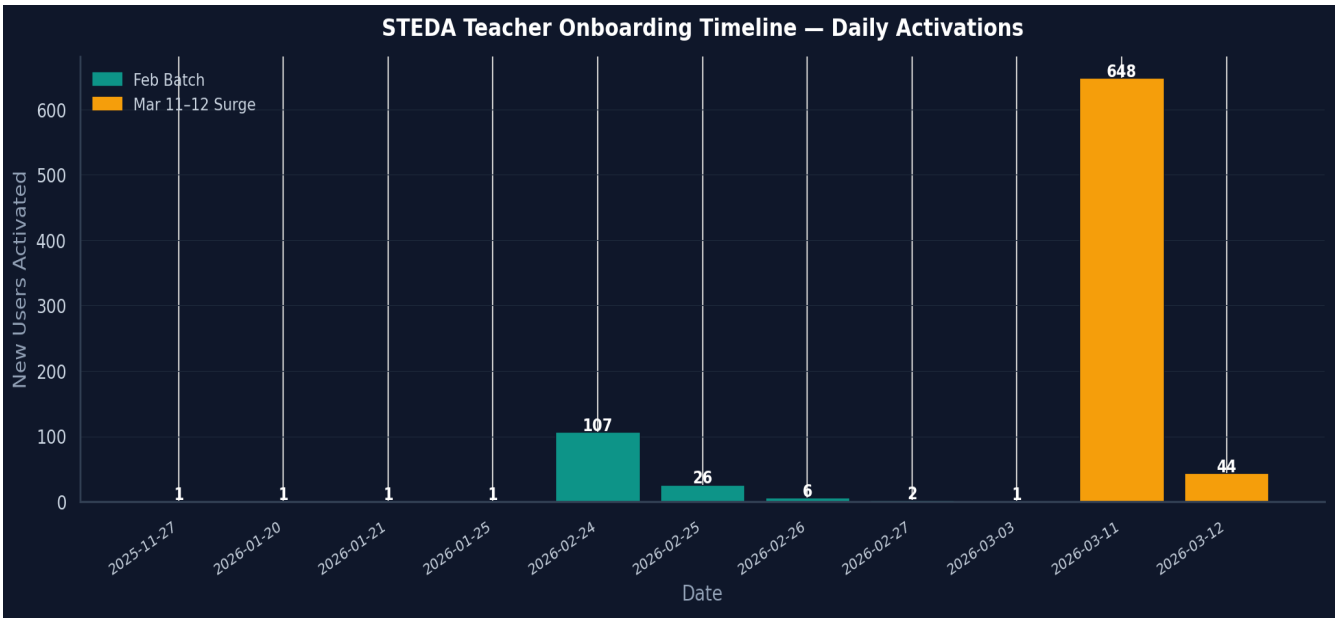

*Figure 2 — Daily teacher activation timeline. The February batch (teal) shows gradual onboarding; the amber bars show the March 11–12 bulk activation event.*

# 02 Teacher Demographics & District Coverage

The STEDA teacher list spans **29 districts** across Sindh, covering both urban centres (Karachi, Hyderabad) and rural areas (Sanghar, Umerkot, Tharparkar). **89.5% are from public schools** — primarily government primary and elementary school teachers.

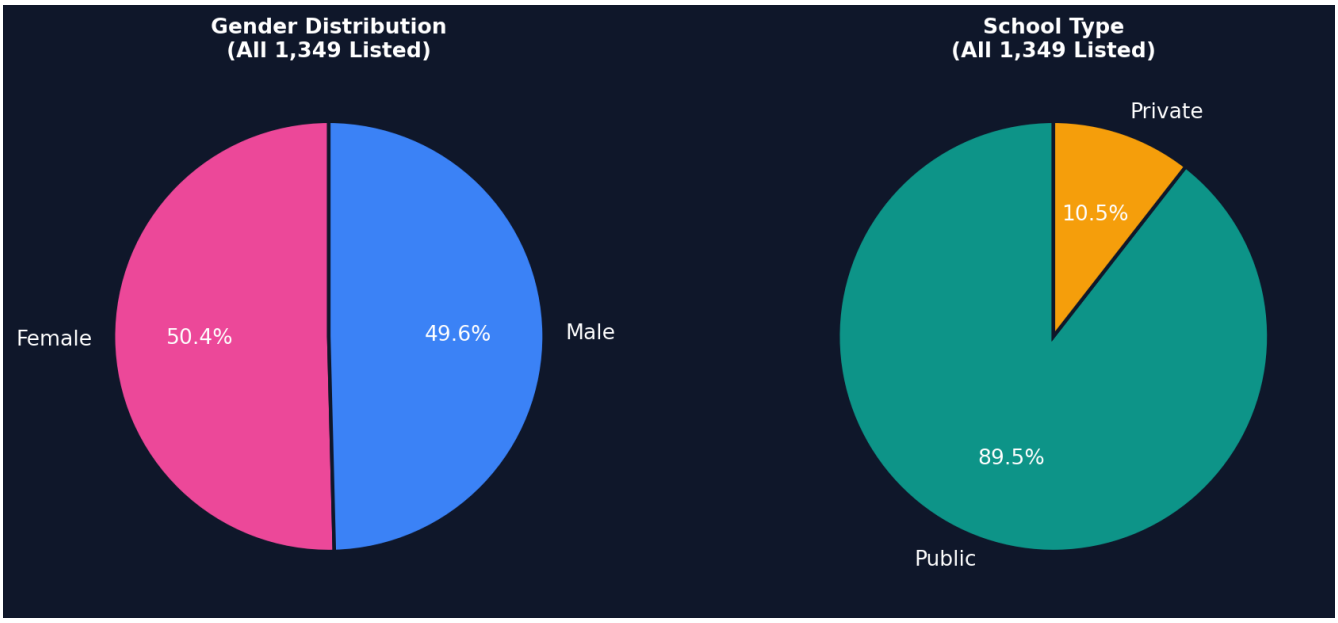

*Figure 3 — Gender split (left) and school type distribution (right) across all 1,349 listed teachers.*

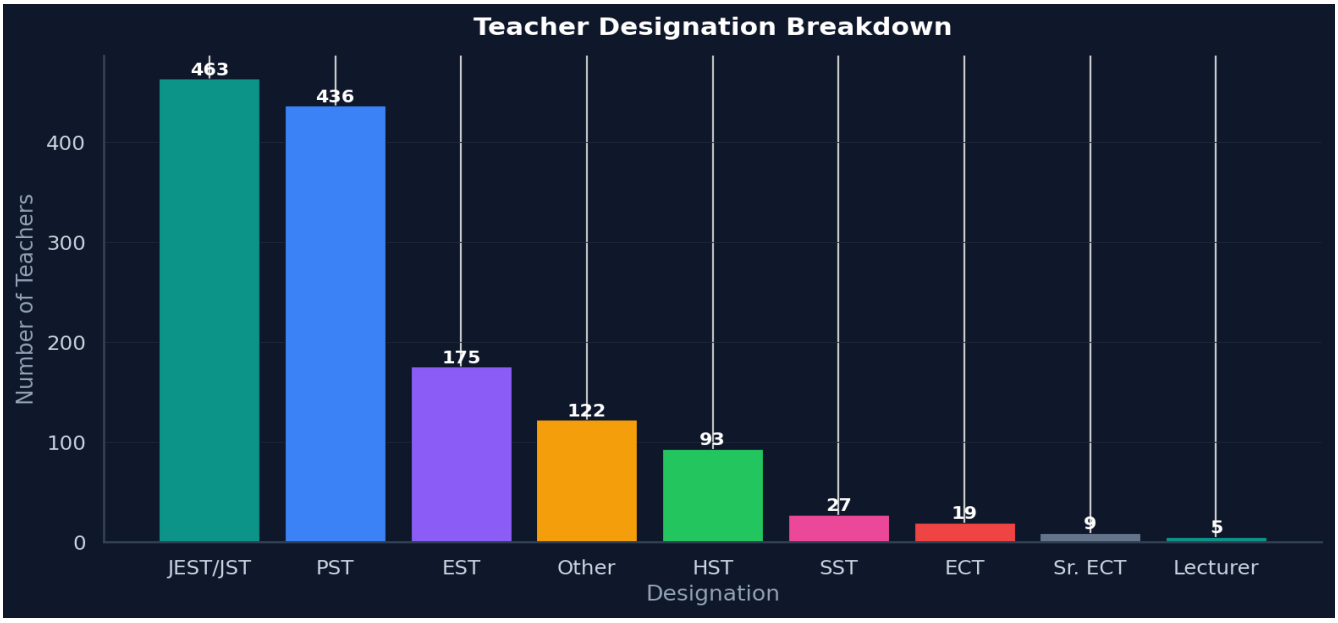

*Figure 4 — Designation breakdown. JEST/JST and PST teachers form the majority — primary and elementary level educators.*

## District-wise Onboarding Breakdown — Top 15

| District | Listed | Joined Rumi | Not Yet | Rate |
|---|---|---|---|---|
| Hyderabad | 115 | 70 | 45 | 61% |
| Karachi | 112 | 69 | 43 | 62% |
| Khairpur Mirs | 101 | 66 | 35 | 65% |

| | | | | |
|---|---|---|---|---|
| SBA | 99 | 51 | 48 | 52% |
| Dadu | 67 | 40 | 27 | 60% |
| Larkana | 65 | 45 | 20 | 69% |
| Karachi Central | 65 | 43 | 22 | 66% |
| **Sanghar** | **54** | **39** | **15** | **72%** |
| Naushehro Feroze | 48 | 27 | 21 | 56% |
| **Sukkur** | **46** | **33** | **13** | **72%** |
| Karachi East | 46 | 26 | 20 | 56% |
| Mirpurkhas | 45 | 28 | 17 | 62% |
| Badin | 43 | 24 | 19 | 56% |
| **Karachi Korangi** | **43** | **30** | **13** | **70%** |
| Umerkot | 39 | 20 | 19 | 51% |

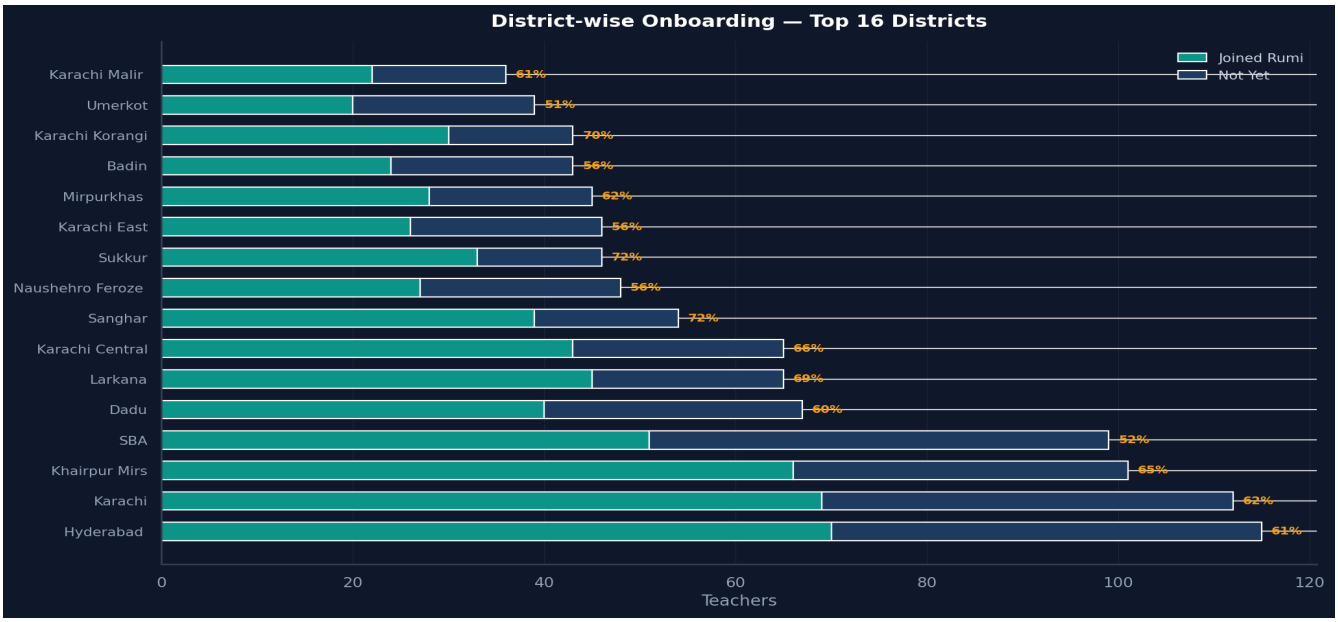

*Figure 5 — Stacked bar: teachers who joined Rumi (teal) vs not yet (dark blue) by district. Percentages on the right show conversion rate.*

# 03 Lesson Plan Generation Activity

STEDA-matched teachers have collectively generated **683 lesson plans**, all successfully completed (100% completion rate). **316 unique teachers** (37% of activated users) have used the lesson plan feature at least once.

| 683 | 316 | 100% | 2.4 min |
|---|---|---|---|
| Lesson Plans Completed | Unique Teachers Used Feature | Completion Rate | Avg AI Processing Time |

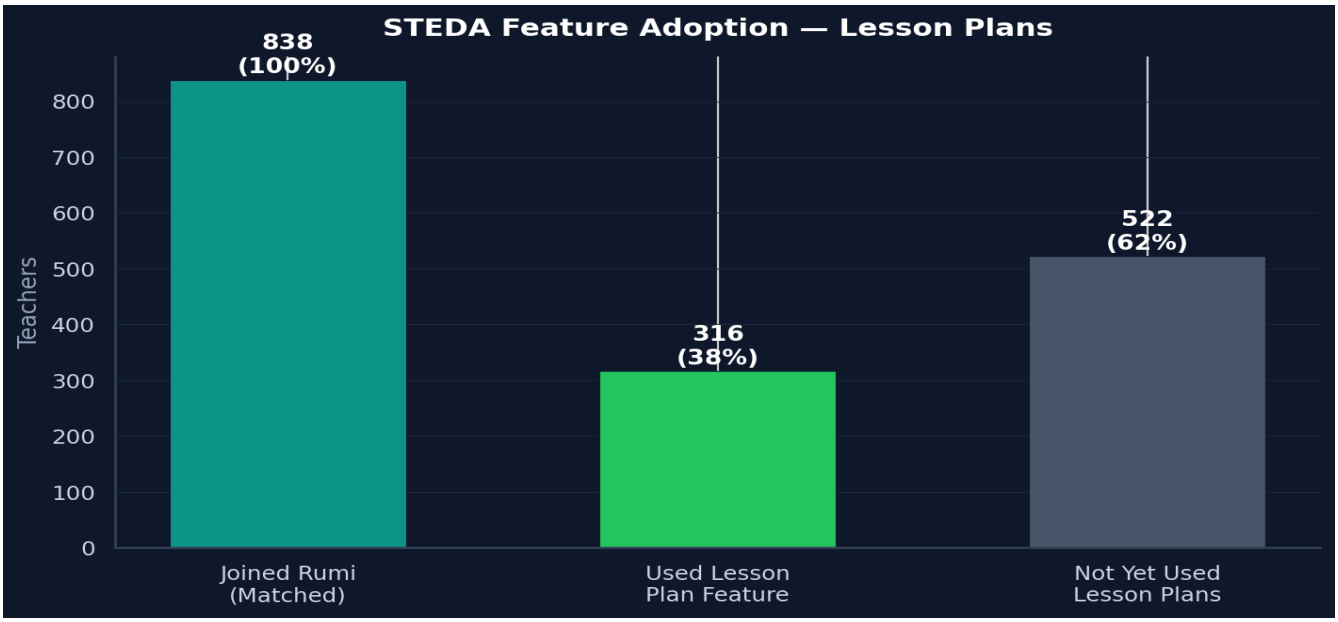

*Figure 6 — Of 853 activated STEDA teachers, 37% have generated at least one lesson plan. The remaining 537 are registered but haven't tried the feature yet.*

## Latency: February vs March 11–12

The February STEDA cohort experienced healthy performance — **median wait 3.2 minutes**. The March 11–12 surge caused a temporary queue overload, pushing average wait to **138 minutes**. Crucially, **AI processing remained stable at 2.4 minutes** throughout — the issue was purely a queue capacity problem triggered by 179 simultaneous requests at 14:00 UTC on March 11.

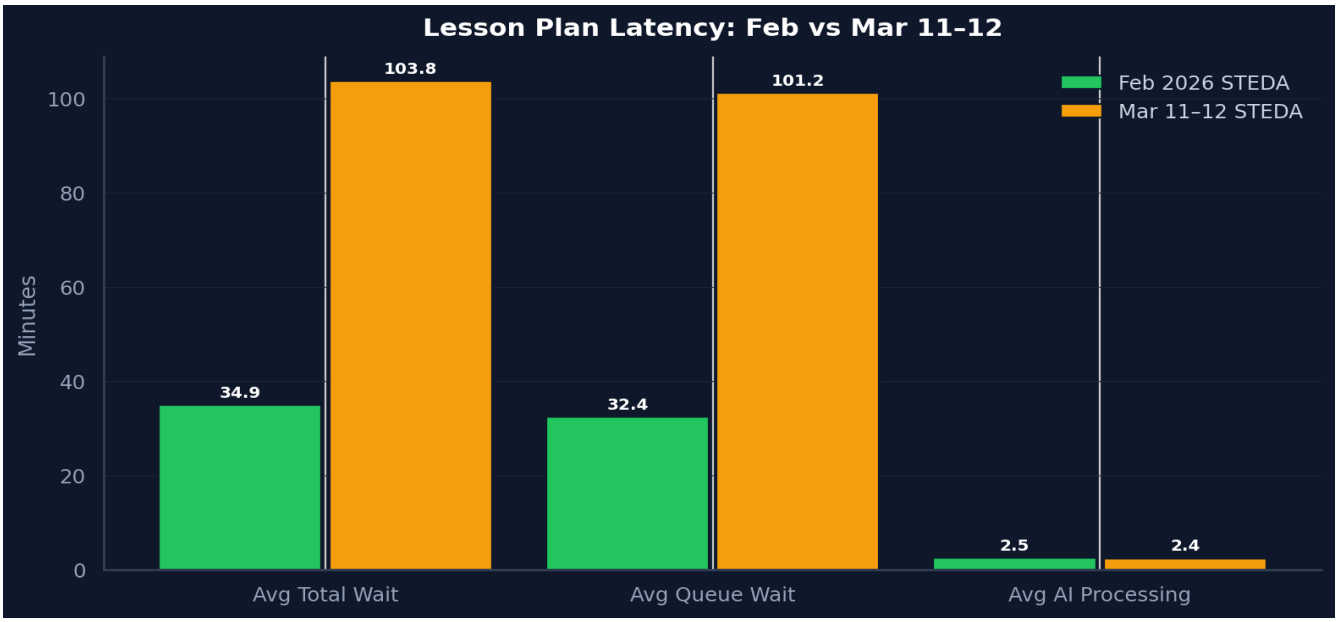

*Figure 7 — Avg queue wait vs avg AI processing time (Feb vs Mar 11–12). AI processing (rightmost bars) is virtually identical — the entire delta is queue wait.*

| Cohort | Requests | Avg Total | Median Total | Avg Queue | Avg AI | Over 10 min |
|---|---|---|---|---|---|---|
| Feb 2026 (90 STEDA users) | 212 | 34.9 min | 3.2 min | 32.4 min | 2.5 min | 24% |
| **Mar 11–12 (199 STEDA users)** | **276** | **138.1 min** | **137.8 min** | **135.7 min** | **2.4 min** | **87.7%** |

# 04 WhatsApp Community — Teacher Voices & Feedback

Within hours of the March 11 onboarding, **503 teachers joined the Rumi WhatsApp community**. **128 unique members** sent messages — an engagement rate of 25% — with **300 user messages** in the first 24 hours. Teachers were simultaneously excited, curious, and navigating real-time challenges.

| 503 | 128 | 300 | 32 |
|---|---|---|---|
| Community Members Joined | Unique Active Participants | Messages in 24 Hours | Teachers Left (6.4%) |

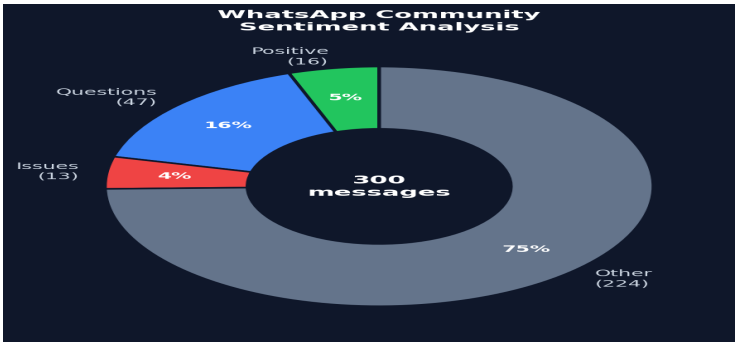

*Figure 8 — Message sentiment analysis across all user messages in the community chat.*

## ❖ What Teachers Said — Positive Voices

*"I am thrilled to be a part of this pilot program! Having an AI assistant to help with lesson planning is a fantastic initiative."*

— Ghulam Nabi

*"Thank you STEDA for providing us such a wonderful platform — it would be beneficial for all the teachers."*

— Imtiaz Ahmed

*"Hats off to the Sindh Education Department and Syed Sardar Ali Shah for this great initiative."*

— Abdul Hameed

*"Lesson plans are generating quite well."*

— Bilal Hussain

*"Amazing ■ Within seconds"*

— Zohaib Hassan

*"Indeed great initiative ■"*

— Bakhtawar

## ■ Issues & Confusion Raised

*"There is a problem in generating animations."*

— Bilal Hussain

*"It still has glitches — but hope with time it will get better."*

— Naeem Nisar Memon

*"I want an Islamiat lesson plan — I asked but never received it."*

— Mehreen

*"I asked for an English subject lesson plan but the response I received was unrelated."*

— Karim Bux

*"Teacher Portal: Username/password given but login is not working."*

— Robeena Sajawal

*"Registration / how to get started was confusing — many asked for guidance."*

— Multiple teachers

# 05 Gap Analysis — The 496 Not Yet Onboarded

**496 teachers (36.8%)** from the STEDA list have not yet joined Rumi. Understanding where the gaps are concentrated helps STEDA focus re-outreach efforts.

## Districts with Lowest Activation Rate (≥15 listed)

| District | Listed | Joined | Not Yet | Rate |
|---|---|---|---|---|
| Karachi South | 25 | 11 | 14 | 44% |
| Qamber Shahdadkot | 18 | 9 | 9 | 50% |
| Umerkot | 39 | 20 | 19 | 51% |
| SBA | 99 | 51 | 48 | 52% |
| Badin | 43 | 24 | 19 | 56% |
| Naushehro Feroze | 48 | 27 | 21 | 56% |
| Karachi East | 46 | 26 | 20 | 56% |
| Dadu | 67 | 40 | 27 | 60% |
| Hyderabad | 115 | 70 | 45 | 61% |
| Karachi Malir | 36 | 22 | 14 | 61% |

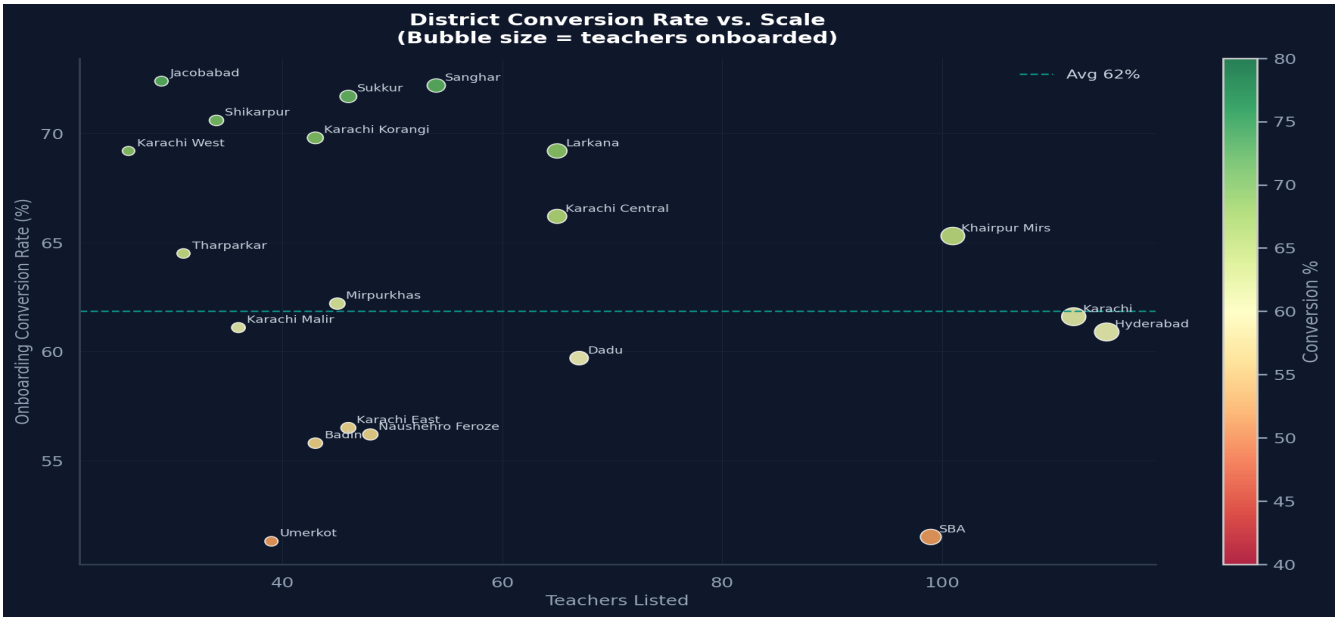

*Figure 9 — Each bubble = one district. X = teachers listed, Y = conversion rate, size = teachers onboarded. Districts below the dashed line need re-outreach.*

## Likely Reasons for Non-Activation

| | |
|---|---|
| ■ **Registration confusion** | Multiple teachers asked in WhatsApp how to register — suggesting the onboarding instructions were not clear enough for first-time WhatsApp AI users. |
| ■ **Phone number mismatch** | 3 entries in the CSV have missing WhatsApp numbers; some numbers may differ from those used in Rumi's database. |

| | |
|---|---|
| ■ **Timing & exam season** | Several teachers noted exams are ongoing ('papers chal rahe hain') and referenced Ramadan — suggesting deliberate deferral. |
| ■ **Technical barriers** | Portal login failures and confusion about where to interact with Rumi created friction for a subset of teachers. |
| ■ **Lack of follow-up** | Some teachers joined the WhatsApp group but may not have received the individual Rumi activation message via WhatsApp. |

# 06 Recommendations & Next Steps for STEDA

Based on the data analysis and teacher feedback, the following actions are recommended as the partnership scales into the next phase.

**1**

### Re-Activate the 496 Missing Teachers

Send a personalised WhatsApp message to each of the 496 phone numbers that have not yet joined Rumi. Include a clear, single-step activation instruction. Assign district focal persons to follow up on low-performing areas (SBA 51.5%, Umerkot 51.3%).

**2**

### Provide a Simple 'Getting Started' Guide

The WhatsApp chat showed widespread confusion about how to use Rumi. Create a 1-page Urdu/English guide with three commands: (1) Create lesson plan, (2) Get coaching, (3) Assess students. Distribute via the WhatsApp announcements group.

**3**

### Fix Portal Login Before Next Batch

Multiple teachers reported portal login failures. Rumi engineering should audit and resolve portal authentication issues before the next bulk activation event.

**4**

### Clarify Video/Animation Expectations

Several teachers expected Rumi to generate videos — a feature not currently available. Add a clear FAQ message to the WhatsApp group explaining current capabilities (lesson plans, coaching, reading assessments) vs. planned features.

**5**

### Pre-Notify Rumi Before Next STEDA Batch

The March 11 surge of 189 teachers caused a 4-hour queue backlog. Before the next activation event, share the expected headcount with the Rumi team so infrastructure can be scaled. A minimum of 48 hours notice is recommended.

**6**

### Celebrate & Share Success Stories

Several teachers produced excellent lesson plans and shared enthusiasm publicly. Capture 3–5 success stories (with teacher permission) for STEDA's stakeholder reports and share them in the WhatsApp community to motivate the remaining 496.

---

This pilot demonstrates that Pakistan's government school teachers are ready, willing, and able to adopt AI tools — when given the right support. The enthusiasm in the WhatsApp community within hours of launch is a strong signal. With the right infrastructure fixes and re-outreach, the STEDA–Rumi partnership is positioned to achieve **full 1,349-teacher activation** within the next 30 days.
