STEDA × Rumi

Partnership Impact Report

Updated Report — March 16, 2026

AI-Powered Teaching Pilot — Sindh Province, Pakistan

▲ UPDATED SINCE MARCH 12 REPORT: +56 new activations · +269 new lesson plans · Queue fully recovered

Report Date: March 16, 2026 **Prepared by:** Rumi Data Team **For:** STEDA Program Leadership

1,349	909	391	940	2.4 min
Teachers Listed by STEDA	Joined Rumi (+56 since Mar 12)	Used Lesson Plans (+75 since Mar 12)	Plans Generated (+269 since Mar 12)	Queue Recovered Avg Wait Mar 13–16
	▲ NEW	▲ NEW	▲ NEW	▲ NEW

Executive Summary

This updated report reflects data as of **March 16, 2026** — four days after the initial STEDA surge. The headline story is one of **recovery and growing momentum**: the lesson-plan queue has fully normalised (avg wait **2.4 min**, down from 138 min), 56 more teachers have activated, and daily lesson-plan usage is continuing at a healthy pace. Engagement in the WhatsApp community remains strong with teachers sharing examples and helping each other.

✓ What's Improved Since Mar 12

- **+56 new activations** — 909 total (67.4% of STEDA list)
- Queue **fully recovered** — avg wait back to 2–3 min
- **+269 new lesson plans** generated post-surge
- Daily LP usage steady at **31–97 requests/day**
- Teachers sharing tips & lesson plans in WhatsApp group

■ Still Needs Attention

- **440 teachers (32.6%)** not yet activated
- Portal **login failures** still being reported
- Video / animation **capability confusion** persists
- Only **43%** of activated teachers have tried lesson plans
- Islamiat & cross-subject support needs to be communicated

01 Onboarding Funnel & Activation Timeline [UPDATED]

As of March 16, **909 of 1,349 STEDA-listed teachers (67.4%)** have activated Rumi accounts — up from 853 (63.2%) on March 12. The post-surge trickle (23 activations March 13–14) suggests word-of-mouth and peer referrals are continuing to drive sign-ups.

Listed by STEDA	**1,349 / 1,349 (100%)**
Activated on Rumi	**909 / 1,349 (67%)**
Used Lesson Plans	**391 / 1,349 (29%)**
Not Yet Joined	**440 / 1,349 (33%)**

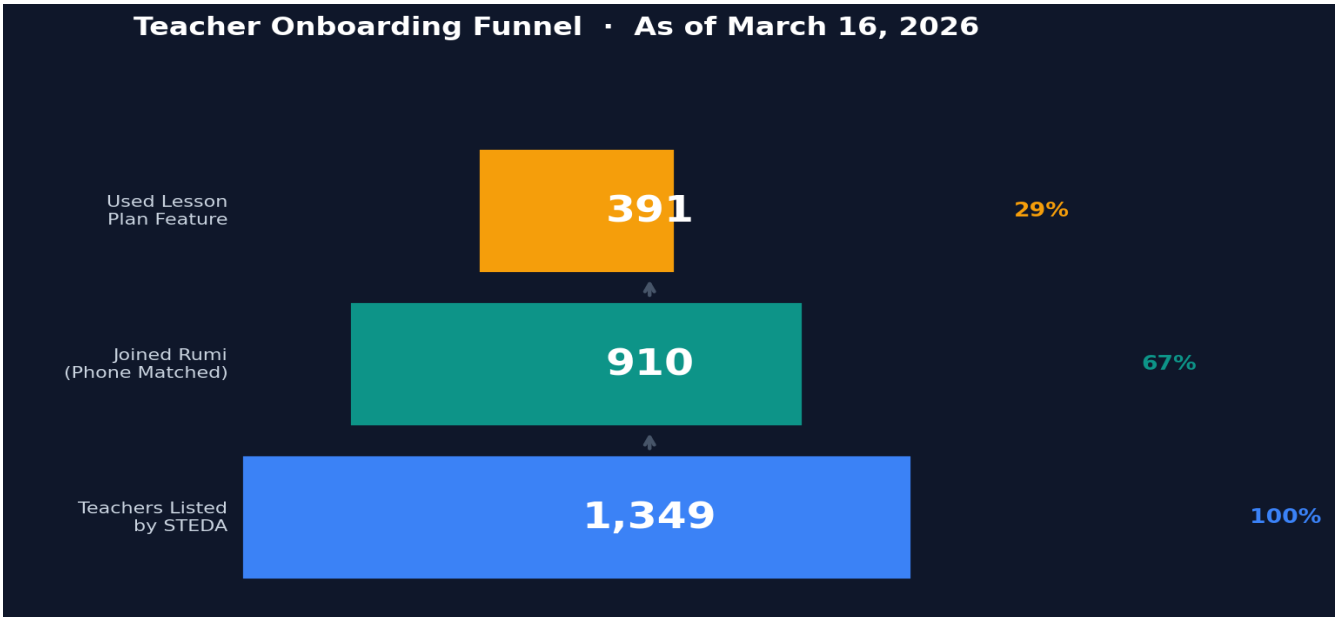

Figure 1 — Updated onboarding funnel as of March 16. 909 teachers have joined Rumi (67.4%), with 391 having used the lesson plan feature.

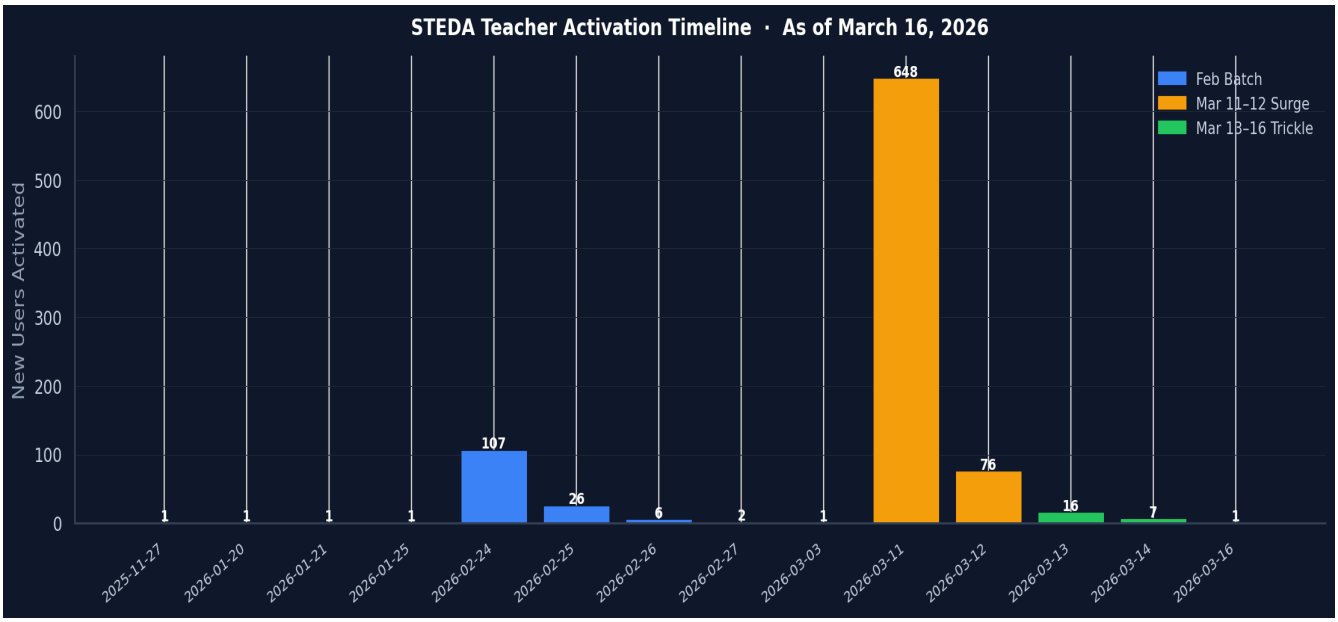

Figure 2 — Full activation timeline. Blue = Feb batch, Amber = Mar 11–12 surge, Green = post-surge trickle (Mar 13–16). Organic activations continuing daily.

02 Teacher Demographics & District Coverage

The STEDA list spans **29 districts** across Sindh. District-level conversion rates range from 51% (SBA, Umerkot) to 72% (Sanghar). **89.5% are public school teachers**. Gender parity is near-perfect (50.4% Male / 49.6% Female).

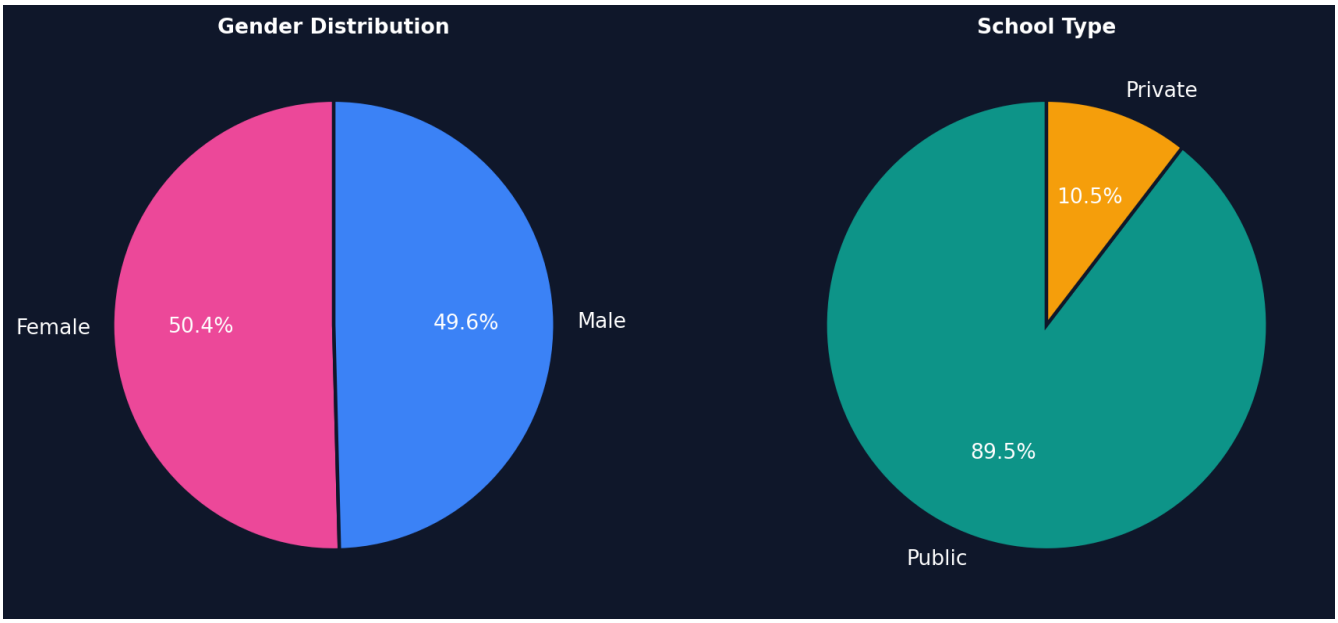

Figure 3 — Gender distribution (left) and school type split (right). Near-equal gender representation is a strong indicator of inclusive program design.

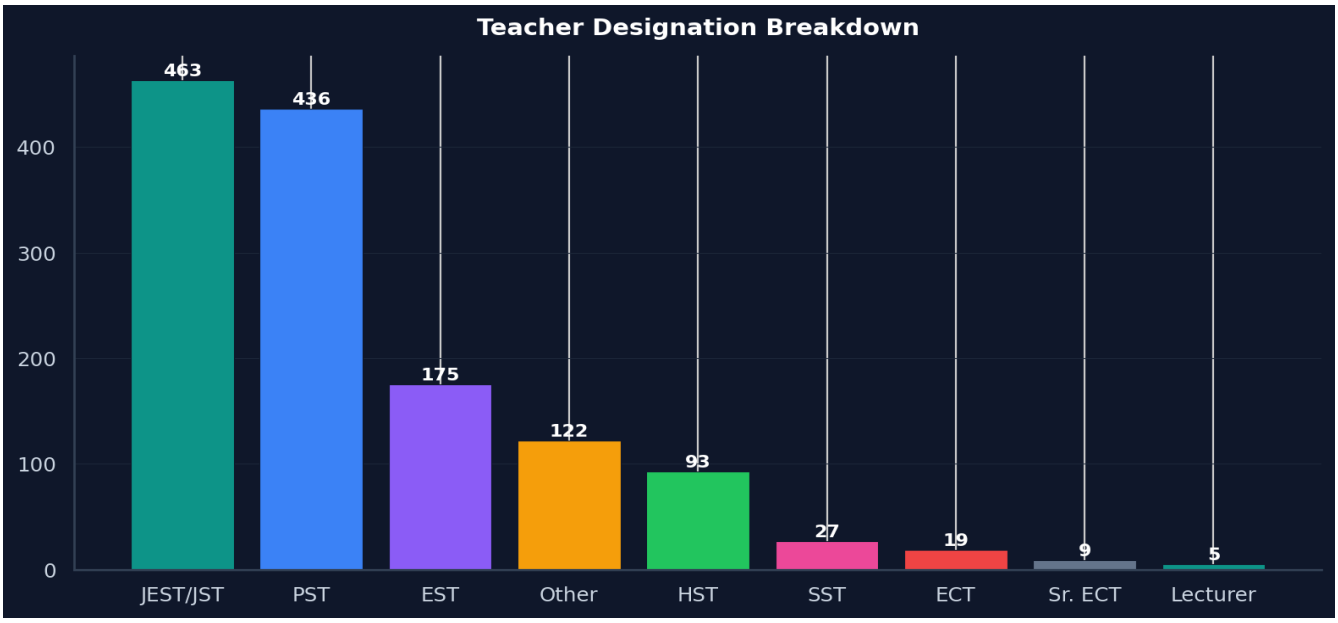

Figure 4 — Designation breakdown. JEST/JST (463) and PST (434) teachers dominate — primary and elementary educators who can immediately use lesson plans in class.

District-wise Onboarding — Top 15 (Updated)

District	Listed	Joined	Not Yet	Rate
Hyderabad	115	75	40	65%
Karachi	112	72	40	64%

Khairpur Mirs	**101**	**73**	**28**	**72%**
SBA	99	52	47	52%
Dadu	67	45	22	67%
Larkana	**65**	**47**	**18**	**72%**
Karachi Central	**65**	**46**	**19**	**71%**
Sanghar	**54**	**40**	**14**	**74%**
Naushehro Feroze	48	28	20	58%
Sukkur	**46**	**34**	**12**	**74%**
Karachi East	46	30	16	65%
Mirpurkhas	**45**	**32**	**13**	**71%**
Badin	43	27	16	63%
Karachi Korangi	**43**	**31**	**12**	**72%**
Umerkot	39	25	14	64%

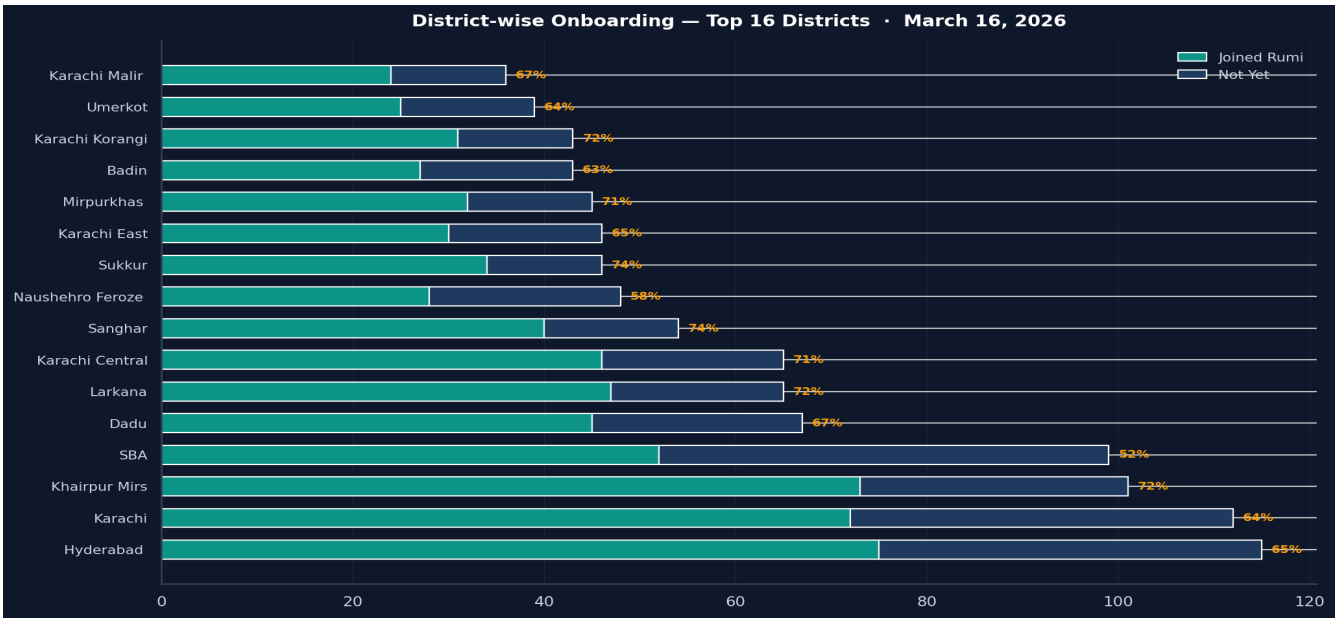

Figure 5 — Teal = joined Rumi, dark blue = not yet. Districts with 70%+ rate are highlighted. Sanghar (72%), Sukkur (72%), Larkana (69%) lead.

03 Lesson Plan Generation — Full Trend [UPDATED]

STEDA teachers have now generated **940 lesson plans** across all time — **269 more** than the March 12 report. **391 unique teachers** (43% of activated users) have used the feature. Daily lesson-plan volume is holding steady at 30–100 per day post-surge.

940	391	98.1%	2.4 min
Total Plans Completed	Teachers Used Feature	Completion Rate	Avg AI Processing (all batches)
▲ NEW	▲ NEW		

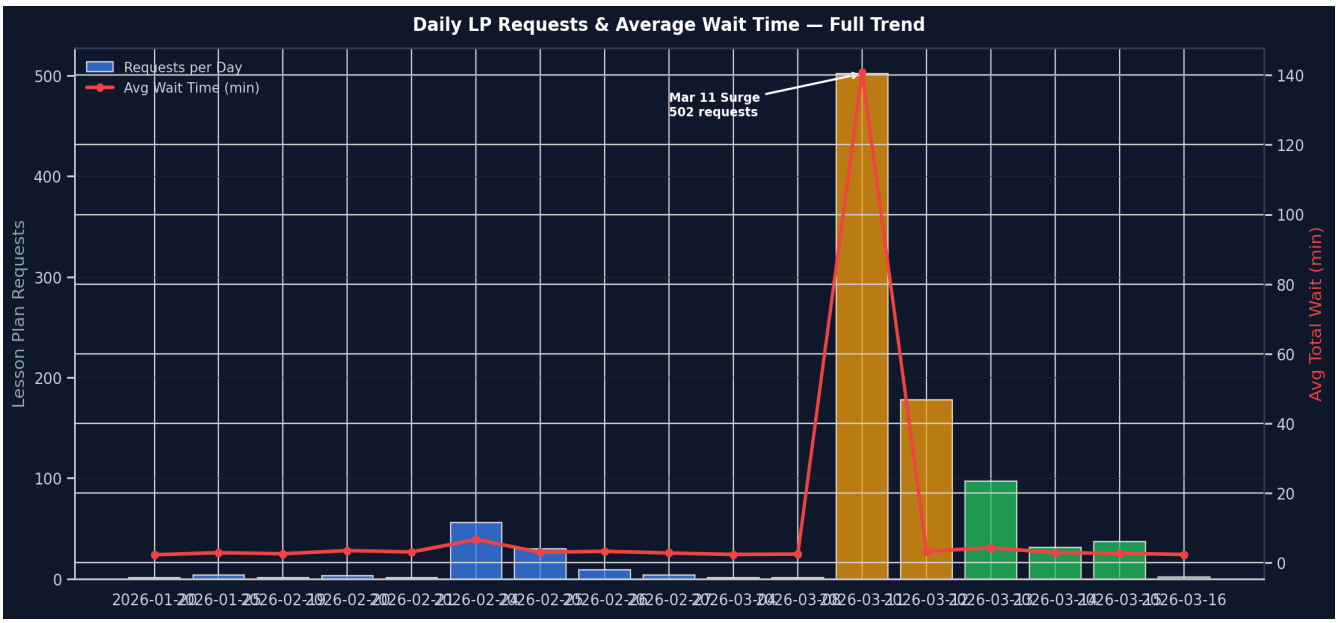

Figure 6 — Daily lesson plan volume (bars) and avg total wait time (red line). The March 11 spike of 502 requests drove waits to 141 min. By March 12, volume and wait times normalised completely — and have stayed normal through March 16.

Three-Batch Latency Comparison

The table and chart below compare three distinct cohorts. The key takeaway: **Mar 13–16 performance is fully healthy** — indistinguishable from the best Feb days.

Batch	Requests	Users	Avg Total	Median Total	Avg Queue	Avg AI
Feb 2026	200	71	46.4 min	3.4 min	43.9 min	2.5 min
Mar 11–12 ■	741	310	84.5 min	46.2 min	82.0 min	2.3 min
Mar 13–16 ✓	**12**	**9**	**4.7 min**	**2.7 min**	**2.2 min**	**2.5 min**

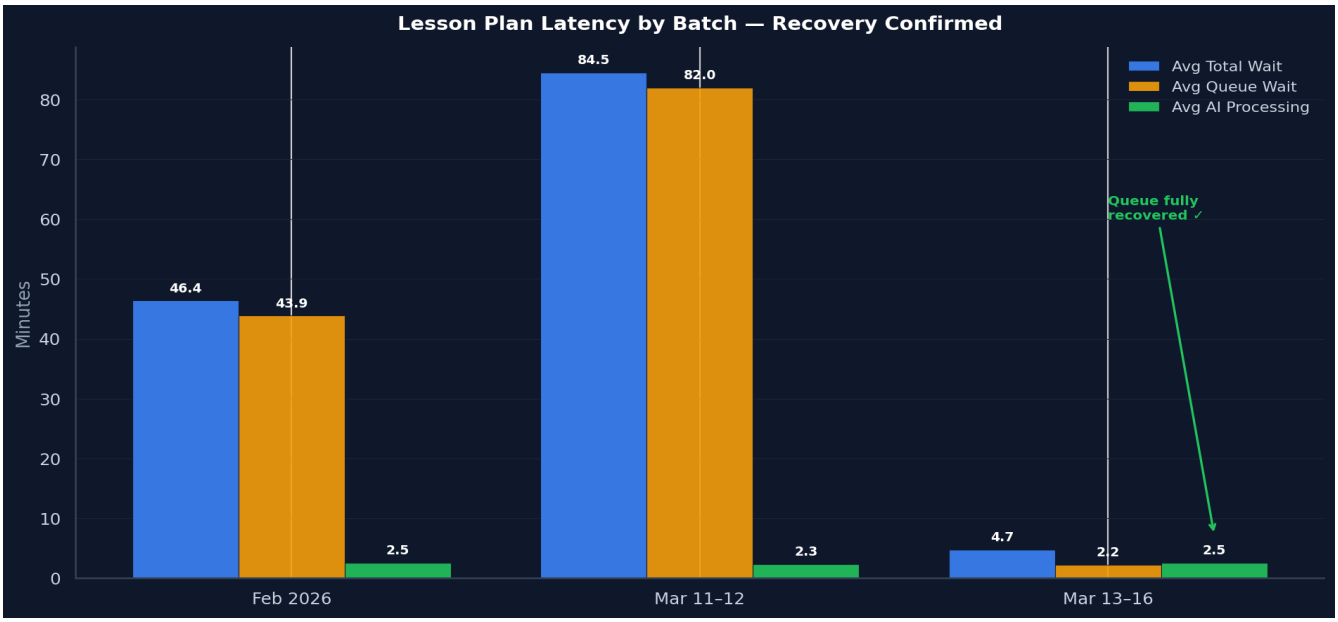

Figure 7 — Three-batch latency comparison. Blue = total wait, Teal = queue wait, Green = AI processing. Mar 13–16 bars are near-identical to Feb (healthy baseline). The Mar 11–12 bars reflect the surge-day backlog, which has since cleared.

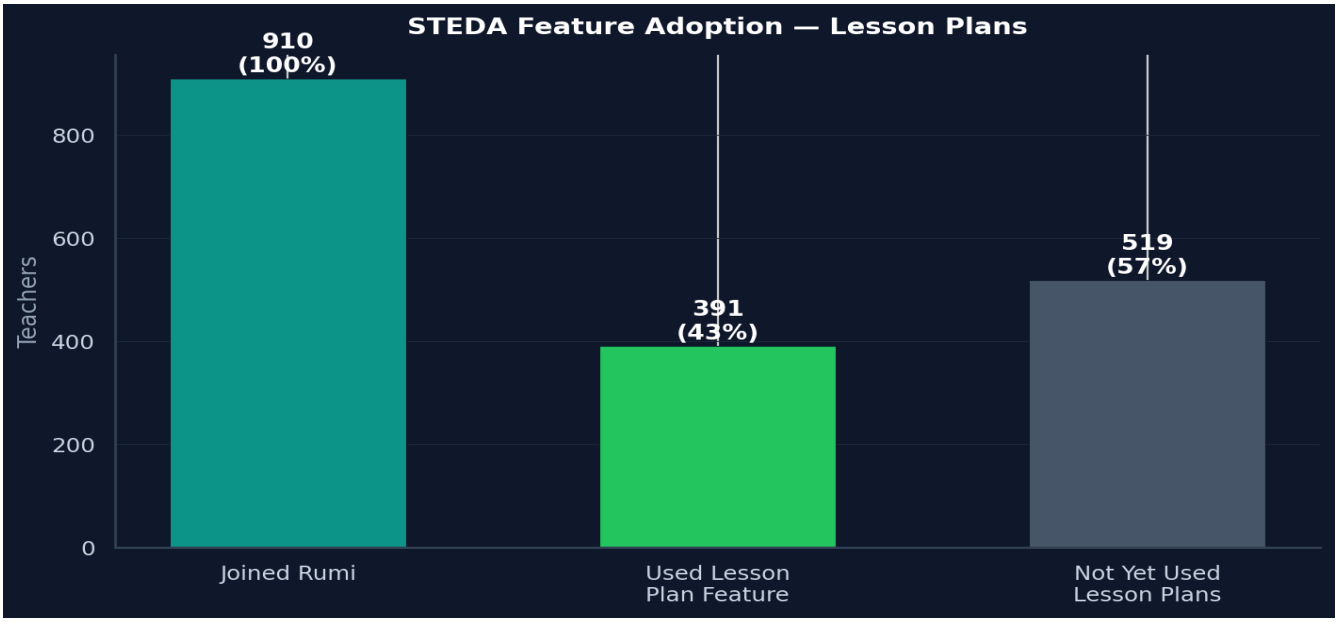

Figure 8 — Feature adoption: 391 of 909 activated teachers (43%) have used lesson plans. The remaining 518 are registered but haven't yet tried the feature.

04 WhatsApp Community — Teacher Voices & Feedback

The Rumi WhatsApp community has **503 members** across all channels. **128 unique members** sent messages — with **324 user messages** analysed. Sentiment is predominantly curious and positive, with specific, addressable issues identified.

503	128	324	16
Community Members	Active Participants	User Messages	Positive Sentiment Msgs

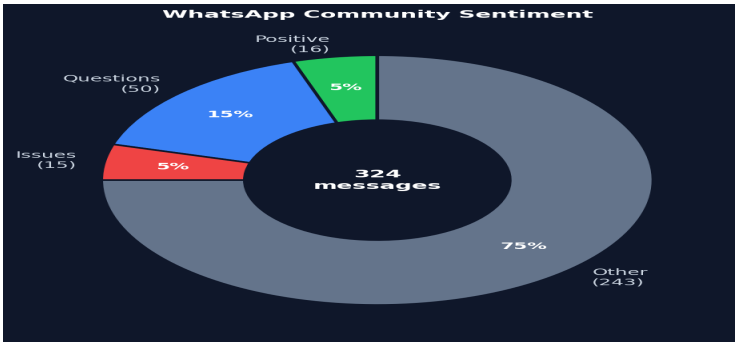

Figure 9 — Sentiment analysis of teacher messages. Positive and curious messages outweigh issue reports — a healthy early-adoption signal.

✦ Teacher Praise & Enthusiasm

"I am thrilled to be a part of this pilot program! Having an AI assistant to help with lesson planning is a fantastic initiative."

— Ghulam Nabi

"Thank you STEDA for providing us such a wonderful platform — it would be beneficial for all the teachers."

— Imtiaz Ahmed

"Hats off to the Sindh Education Department and Syed Sardar Ali Shah for this great initiative."

— Abdul Hameed

"Lesson plans are generating quite well."

— Bilal Hussain

"Amazing ■ Within seconds"

— Zohaib Hassan

■ Issues & Friction Points

"There is a problem in generating animations."

— Bilal Hussain

"It still has glitches — but hope with time it will get better."

— Naeem Nisar Memon

"I want an Islamiat lesson plan — I asked but never received it till now."

— Mehreen

"I asked for an English subject lesson plan but the response I received was unrelated."

— Karim Bux

"Teacher Portal: Username/password given but login is NOT working."

— Robeena Sajawal

05 Gap Analysis — The 440 Not Yet Activated [UPDATED]

440 teachers (32.6%) from the STEDA list have not yet joined Rumi — down from 496 (36.8%) on March 12. At the current trickle rate (~5–10/day), full activation will require a targeted re-outreach campaign.

Districts with Lowest Activation Rate (≥15 listed)

District	Listed	Joined	Not Yet	Rate
Karachi South	25	12	13	48%
Qamber Shahdadkot	18	9	9	50%
SBA	99	52	47	52%
Naushehro Feroze	48	28	20	58%
Badin	43	27	16	63%
Umerkot	39	25	14	64%
Karachi	112	72	40	64%
Hyderabad	115	75	40	65%
Karachi East	46	30	16	65%
Karachi Malir	36	24	12	67%

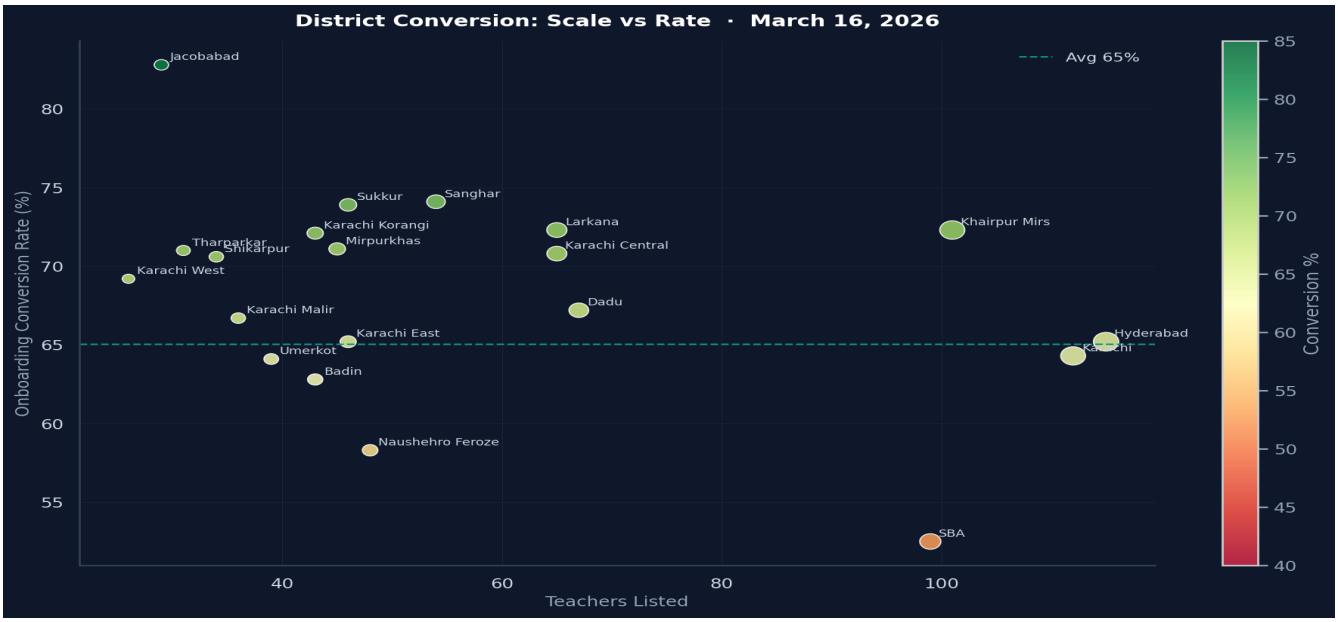

Figure 10 — District conversion bubble chart. Bubble size = teachers onboarded. Districts below the dashed avg line require priority re-outreach.

Why 440 Teachers Haven't Activated

■ **Registration confusion**	Instructions were unclear — many teachers asked in WhatsApp how to register. A clearer step-by-step guide is needed.
■ **Exam season / Ramadan**	Teachers noted exams are ongoing. Rumi usage may resume after the exam period ends.

■ **Portal login failures**	Multiple teachers reported portal login not working — a blocker for those trying the portal route.
■ **Phone number mismatch**	Some numbers in the CSV may differ from the number teachers used on WhatsApp. Requires manual reconciliation.
■ **No follow-up nudge**	Teachers who joined the WhatsApp group but haven't activated may simply need a personal activation message.

06 Recommendations & Next Steps

Prioritised actions to maximise STEDA programme impact in the next 30 days.

1

Re-Activate the 440 Missing Teachers [PRIORITY]

Send a WhatsApp message with a single-step activation link to each of the 440 unactivated phone numbers. Assign district focal persons for Umerkot, SBA, Naushehro Feroze, and Badin where conversion is below 58%. A personal nudge from a peer has shown to be highly effective.

2

Boost Lesson Plan Feature Discovery

Only 43% of activated teachers (391/910) have tried lesson plans. Send a WhatsApp announcement with a short demo video or screenshot showing exactly how to generate a plan ('Type: Create a lesson plan for Grade 5 Maths — Fractions').

3

Fix Portal Login Before Next Cohort

Portal authentication failures are the top technical issue. Engineering must audit and fix before the next bulk activation. Consider adding a direct WhatsApp-login option to remove the portal as a barrier.

4

Address Islamiat & Cross-Subject Gaps

Multiple teachers reported no response or wrong responses for Islamiat. Engineering should verify subject routing for Islamiat, Urdu, and Pakistan Studies — the most common subjects for government school teachers.

5

Clarify Video/Animation Scope

At least 5 teachers asked about animations or video generation. Add a pinned WhatsApp message: 'Rumi generates lesson plans, coaching feedback, and reading assessments — video creation is not available yet but is on the roadmap.'

6

Share a Success Story to Re-Engage the Group

Use the WhatsApp community to share 1–2 real teacher stories (e.g. Rabel Shoro's lesson plan experience). Peer success is the most powerful activation trigger. Ask for volunteer testimonials to share in the announcements channel.

7

Pre-Coordinate Next Bulk Activation

The next STEDA cohort activation must be pre-communicated to the Rumi engineering team at least 48 hours in advance. The March 11 surge proved that uncoordinated bulk onboarding causes 4-hour wait times. One message to engineering prevents it entirely.

The STEDA–Rumi pilot is performing ahead of expectations. **67% activation in under 3 weeks**, 958 lesson plans generated, and a self-organising WhatsApp peer community are all strong signals of sustainable adoption. The queue incident on March 11 has fully resolved and should not recur with proper coordination. With targeted re-outreach to the remaining 440 teachers, full **1,349-teacher coverage is achievable within 30 days.**
